

## LIST OF FIGURES AND TABLES

Table or Figure	Page
➤ Figure 1a. The Firth of Lorn and southern approach of Mull.	6
➤ Figure 1b. The Gulf of Corryvreckan, Scarba and Jura.	6
➤ Figure 2. The location of the viewpoint and layout of the sectors.	7
➤ Figure 3. This panoramic view of the Gulf of Corryvreckan.	8
➤ Figure 4. The Session and Period times designed on the tidal categories.	10
➤ Table 1. Species-groups, common and Latin names of seabird species likely to be seen in the Gulf of Corryvreckan.	12
➤ Table 2. Abundance categories used for recording group size and associated numbers.	12
➤ Table 3. Behaviour categories used to define activity of seabird species.	13
➤ Table 4. Cetaceans that could be sighted in the Firth of Lorn	14
➤ Table 5. BIOENV results showing the number of variables, associated levels of correlation and variables	16
➤ Table 6. Variable categories and identifying numbers used by BIOENV procedure.	17
➤ Table 7. Frequency of observations for each species by abundance categories.	19
➤ Figure 5. After all periods were pooled and species abundances averaged per session.	20
➤ Figure 6-1. The numbers of mean values for seabird species-groups are arranged by abundance category.	21
➤ Figure 6-2. Because Porpoise were recorded as actual observed numbers, they are displayed in separate abundance categories.	22
➤ Table 8-1. Results for the Pairwise test on Tidal Direction.	23
➤ Table 8-2. Results of the SIMPER and Chi-squared test on Tidal Direction.	23
➤ Table 8-3. Chi-squared results for species with significant values on Tidal Direction test.	24
➤ Table 9-1. Results of the Pairwise test on Tidal Strength.	25
➤ Table 9-2. Results of the SIMPER and Chi-squared test on Tidal Strength.	25
➤ Table 9-3. Chi-squared results for species with significant values on Tidal Strength test.	26
➤ Table 10-1. Pairwise test results between sectors.	27
➤ Figure 7. The non-significant results of the ANOSIM	28
➤ Table 10-2. $\chi^2$ test results for each species-group, by sectors.	29
➤ Table 10-3. Residual values for Observed and Expected counts for species-groups, by sector.	29
➤ Figure 8. The Residual Index Values (sector residual by species ÷ species total) for each sector as in Table 10-3.	30
➤ Table 11. The hydrographic characteristics of each sector during an ebb or flood tide.	34
➤ Figure 9. Setting off with kit.	47
➤ Table 12. Kit List	48
➤ Figure 10. Tentage.	49
➤ Figure 11. The viewpoint set-up.	50
