

## SPRING TIDES DATES 2020

In the following Tides chart the \*symbol denotes the relative strength of tide in the Gulf of Corryvreckan when the tidal range is 3.7 metres or more. Wind strength, wind direction, atmospheric pressure, whether ebb or flood tide and the hour of the tide affect what you will see on the day.

		March	April
* denotes tidal rise at Oban of 3.7 metres to 3.9 metres	*** denotes tidal rise at Oban of 4.0 metres to 4.2 metres	8 *	7 **
** denotes tidal rise at Oban of 3.9 metres to 4.0 metres	**** denotes tidal rise at Oban of 4.2 metres to 4.4 metres	9 **	8 ****
